

What if Google made a tablet just for you?

It would be easy to use. It would come alive with your apps and content from the moment you sign in. And every feature in its thin, light frame would serve you and your life. More friendly, more fun, more of the things you care about most.

It would have the highest resolution display of any tablet its size, so you could see every detail of your favorite movies. It would come with the

largest digital library in the world. And it would anticipate weather, traffic and the unforeseen so you can get on with your life. Because, at the end of the day, even with all the cool technology we build into it, the most important thing about the Nexus 7 is, still and always, the person using it.

Introducing the new Google Nexus 7.

Powerful, portable and made for what matters.
