

In *A Geographical Survey*, Rose Marie Cromwell examines the complex history of the American West and how competing myths and histories have shaped the land. The project is a political and personal reunion for Cromwell, who grew up in the region and returns as an artist, mother and environmentalist grappling with the legacy of her past and anxiety for the future. "As we get older, and our identities form, understanding the significance of where you are from and how it's shaped who you are and your values feels important, especially as a parent," says Cromwell, who lives in Miami. "The project is a homecoming of sorts. I wanted to look back and figure out how I became who I am."
