

MAYBE IT'S TIME TO BREAK UP ◁◁ With Your Current ▷▷ BIRTH CONTROL

AND ASK ABOUT THE 100% HORMONE-FREE,
MORE THAN 99% EFFECTIVE PARAGARD®
(INTRAUTERINE COPPER CONTRACEPTIVE) IUD.

DID YOU KNOW BIRTH CONTROL CAN BE HIGHLY EFFECTIVE WITHOUT ANY HORMONES? PARAGARD® is the only IUD that's 100% hormone free and lasts up to 10 years. It can be placed during a routine office visit and removed at any time. There are no daily routines or refill hassles, just a simple monthly string check.

If you've tried other birth control methods that just aren't working for you, maybe it's time to talk to your healthcare provider about PARAGARD®.

Under the Affordable Care Act (ACA), PARAGARD® may now be available to insured women without a co-pay or other out-of-pocket costs. Check with your insurance provider.

PARAGARD® is indicated for intrauterine contraception for up to 10 years.

IMPORTANT SAFETY INFORMATION

Do not use PARAGARD® if you have a pelvic infection, get infections easily or have certain cancers. Less than 1% of users get a serious infection called pelvic inflammatory disease. If you have persistent pelvic or stomach pain, or if PARAGARD® comes out tell your healthcare provider. If it comes out, use back-up birth control. In rare cases, PARAGARD® may attach to or go through the uterine wall and cause other problems. Although uncommon, pregnancy while using PARAGARD® can be life threatening and may result in loss of pregnancy or fertility. Bleeding or spotting may increase at first but should decrease in 2 to 3 months. PARAGARD® does not protect against HIV or STDs.

You are encouraged to report negative side effects of prescription drugs to the FDA at www.fda.gov/medwatch or call 1-800-FDA-1088.

Please see the following page for a brief summary of Prescribing Information.

PARAGARD®
T380A
intrauterine copper contraceptive

Ask your doctor if PARAGARD® is right for you.
Visit PARAGARD.com or call 1-877-PARAGARD (727-2427).
